Project Name: Ejido Topia

Project ID: CAR 1494

Project Standard: Climate Action Reserve

Section: 44475 Specific Language	
a) Details regarding the applicable carbon offset project, including the following information:	
1)	Specific protocol used to estimate emissions reductions or removal benefits: Mexico Forest Protocol, v. 3
2)	The location of the offset project site: Durango, Mexico
3)	The project timeline: 28 June 2020 - 27 June 2120
4)	The date when the project started or will start: June 28, 2020
5)	The date and quantities when a specified quantity of emissions reductions or removals started or will start: June 14, 2022 - June 13, 2023: ~14,200 mt June 14, 2023 - June 13, 2024: ~14,200 mt
6)	Type of project, including whether the offsets from the project are derived from a carbon removal, an avoided emission, or the case of a project with both carbon removals and avoided emissions, the breakdown of offsets from each: Improved Forest Management Carbon Removal
7)	Whether the project meets any standards established by law or by a nonprofit entity: Yes, Climate Action Reserve
8)	The durability period for any project that the seller knows or should know that the durability of the project's greenhouse gas reductions or greenhouse gas removal enhancements is less than the atmospheric lifetime of carbon dioxide emissions: Projects may commit to maintain sequestered carbon due to project activities for any length of time; however, credits are issued proportional to the length of commitment relative to 100 years. A buffer pool is established to account for the risk of potential reversals, which can arise from various factors like illegal logging, changes in land use, excessive harvesting, wildfires, disease outbreaks, or other sudden catastrophic events. In this project, the overall risk is calculated at 30.86%.
9)	Whether there is independent expert or third-party validation or verification of the project attributes: Yes, validation and verification
10)	Emissions reduced or carbon removed on an annual basis: 14,000 tCO ₂ e/year estimate
b) Details regarding accountability measure if a project is not completed or does not meet the project emissions reductions or removal benefits, including but not limited to, details regarding what action the entity, either directly or by	

contractual obligation shall take under both of the following circumstances:		
1)	If carbon storage projects are reversed	Page 53: https://www.climateactionreserve.org/wp-content/uploads/2022/10/Mexico-Forest-Protocol-V3.0_ENG.pdf
