Project Name: Proyecto Mirador Enhanced Distribution of Improved Cookstoves in Latin America - First VPA for Distribution of Dos por Tres Cookstoves in Honduras

Project ID: GS2758

Project Standard: Gold Standard

Section: 44475 Specific Language		
a) Details regarding the applicable carbon offset project, including the following information:		
1)	Specific protocol used to estimate emissions reductions or removal benefits:	Reduced Emissions from cooking and Heating - Technologies and Practices to Displace Decentralized Thermal Energy Consumption (TPDDTEC) - GS TPDDTEC v 2.
2)	The location of the offset project site	Honduras
3)	The project timeline:	May 01, 2023 — April 30, 2030
4)	The date when the project started or will start:	May 1st, 2009
5)	The date and quantities when a specified quantity of emissions reductions or removals started or will start:	Vintage 2022: 280,039
6)	Type of project, including whether the offsets from the project are derived from a carbon removal, an avoided emission, or the case of a project with both carbon removals and avoided emissions, the breakdown of offsets from each	Cookstoves Avoided Emissions
7)	Whether the project meets any standards established by law or by a nonprofit entity	Yes, Gold Standard for the Global Goals
8)	The durability period for any project that the seller knows or should know that the durability of the project's greenhouse gas reductions or greenhouse gas removal enhancements is less than the atmospheric lifetime of carbon dioxide emissions	Emission reductions are permanently prevented from entering the atmosphere.
9)	Whether there is independent expert or third-party validation or verification of the project attributes	Yes, validation and verification
10)	Emissions reduced or carbon removed on an annual basis	421,201 tCO ₂ e/year estimate
b) Details regarding accountability measure if a project is not completed or does not meet the		

project emissions reductions or removal benefits, including but not limited to, details regarding what action the entity, either directly or by contractual obligation shall take under both of the following circumstances:		
1)	If carbon storage projects are reversed	This project has no danger of reversal; emissions are permanently avoided.
2)	If future emissions reductions do not materialize	These credits are Ex-Post not Ex-Ante
c) Pertinent data and calculation methods needed to reproduce and verify the number of emissions reductions issued using the protocol		The data and calculation methods can be reproduced as outlined in the following document: Emission Reduction Calculation Excel File (gs2758_VP12-01 ER Calculations v1.1 21 May 2022 Public.xlsx), found here: https://platform.sustain-cert.com/public-project/512
Section: 44475.1 Specific Language		
a)	The Name of the business entity selling the offset	Cool Effect, Inc.
	& Offset Registry	Gold Standard for Global Goals
b)	Project Identification Number	GS 2758
c)	The project name as listed on the registry	Proyecto Mirador Enhanced Distribution of Improved Cookstoves in Latin America.
d)	The offset project type, including whether the offsets purchased were derived from a carbon removal, an avoided emission, or a combination of both, and site location.	Avoided emissions Site location noted above
e)	The specific protocol used to estimate emission reductions or removal benefits	Reduced Emissions from cooking and Heating - Technologies and Practices to Displace Decentralized Thermal Energy Consumption (TPDDTEC) https://globalgoals.goldstandard.org/407-ee-ics-technologies-and-practices-to-displace-decentralized-thermal-energy-tpddtec-consumption/
f)	Whether there is independent third-party verification of company data and claims listed	Yes, all documentation of verification and validation can be found here: https://platform.sustain-cert.com/public-project/512
